

PROVU Series

Dual-Line 6-Digit Flow Rate/Totalizers

Perfect for Flow Applications.

The PD6200 and PD6300 PROVU® meters are 1/8 DIN flow rate/ totalizers specifically designed for displaying flow rate and total from flowmeters with analog or pulse outputs.

These flow rate/totalizers are particularly well-suited for flow applications because they can display flow rate and flow total at the same time, provide power to drive the flowmeter, and display flow total, flow grand total, or non-resettable flow total on up to nine digits.

Display Flow Rate, Total or Grand Total

The upper display can be programmed to display flow rate, total, or grand total, and the lower display can be programmed to display flow rate, total, grand total, engineering units, custom legends, or can be turned off. Both displays could also display relay set points, or max and min values.
