

Uni-Dose® Series UD

Chemical Metering Pump

NEW

An Entire Range in a Single Model

Introducing the Uni-Dose® Series UD Chemical Metering Pump

The Uni-Dose® Series UD pump is designed for maximum convenience and adaptability in well water treatment applications. With electronic capacity control, full discharge stroke, and universal voltage supply, the UD improves upon the original range, all with a single pump model.

What's new:

One model

1-24 GPD (4-90 LPD), 80 PSI (5.5 bar), 160 SPM

Universal power supply

115V-230V, 50/60 Hz with interchangeable power cord

Speed control dial

Electronic capacity control allows smooth adjustment across the entire operating range

Protected Electronics

An internal varistor and fuse protect the unit from power surges

Build to last

UV and heat resistant housing 122°F / 50°C
Water resistant construction, NEMA 4X/IP65

Liquid End

New head and diaphragm designed for improved performance. Integrated priming valve for fast and easy start-up

What's the same:

Installation

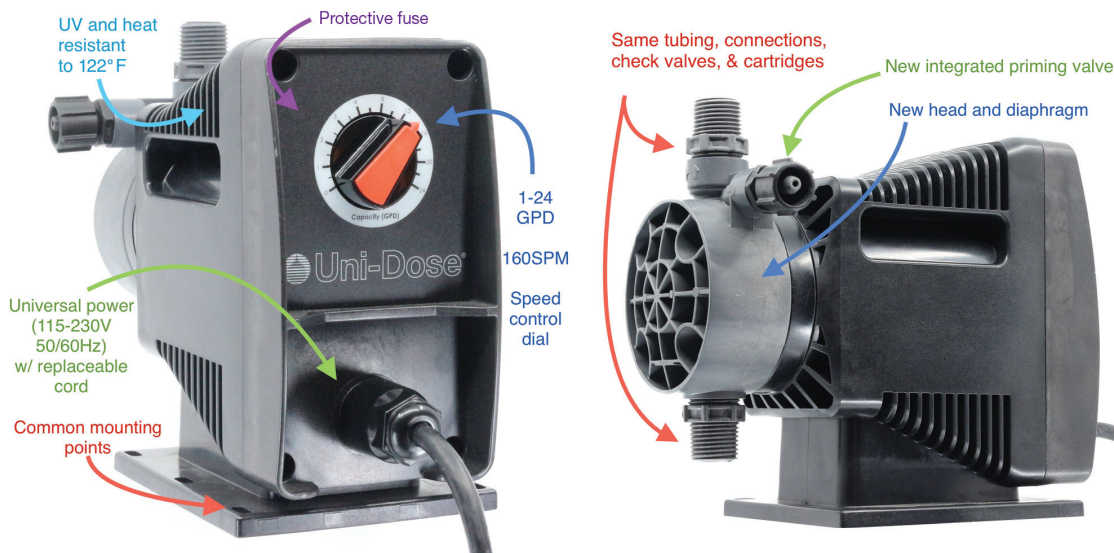

Same footprint and common mounting points as the original

Accessories

Same tubing, connections, check valves, and cartridges as the LE-281TT

Certifications

NSF 61 & ANSI 372, UL, cUL
